TRAUMA SYSTEMS & EXECUTIVE MEDICAL READINESS

SAIBATU MANSARAY, PA-C, MIS, FAPH

Trauma Systems & Emergency Medical Readiness Advisor | Former White House Medical Operations Leader

Saibatu Mansaray is a retired U.S. Army Major, board-certified Physician Assistant, and former White House medical operations leader with extensive experience in trauma systems, emergency medical services, executive medical contingency planning, and operational readiness.

During her service with the White House Medical Unit, Mansaray provided tactical and emergency medical support to the President and Vice President of the United States. She subsequently served as Director of Medical Advance and Operations Officer, leading multidisciplinary clinical operations and coordinating medical contingency planning for high-profile domestic and international missions.

Her responsibilities included developing medical evacuation strategies across more than 45 countries and evaluating the capabilities of hospitals, trauma centers, and emergency medical services to support timely, coordinated emergency response. She also authored the White House Medical Unit's inaugural Tactical Medical Officer training curriculum and contingency medical policy manual.

A veteran of combat deployments to Iraq, Mansaray led frontline trauma care, multidisciplinary medical teams, and mass-casualty preparedness initiatives. Her military service earned numerous distinctions, including two Bronze Star Medals and the Combat Medical Badge.

She brings to advisory and consulting engagements a combination of clinical judgment, operational leadership, interagency coordination, and practical experience designing medical readiness systems in high-risk environments. Her expertise is particularly relevant to organizations seeking to strengthen trauma response capabilities, emergency preparedness, medical contingency planning, and healthcare operational resilience.
